The Nurit 8000GRPS wireless credit, ATM/debit and EBT card processing terminal is a hit at Farmers Markets across the USA.

EBT, credit card and ATM/debit cards are now being accepted at Farmers Markets across the United States.

Farmers market vendors are growing the demand for Wireless EBT processing. State EBT programs have become very popular and are being used to promote healthier eating by the offering the opportunity for consumers to purchase fresh produce from local farmers markets. By purchasing produce locally, it helps to grow the economy locally. More citizens will have increased access to farm-fresh food at selected farmers markets this season.

Iowa Farmers Markets are leading the way with wireless EBT, credit card and ATM/debit card acceptance.
